PROJECTS

Phillip Fund SuperMart Platform

Outsourced software development for its fund management and distribution platform, called Phillip Fund SuperMart. Developing in MS Azure Cloud Architecture.

American Tax Solutions

AMERICAN TAX SOLUTIONS was a Web-Based ASP.NET MVC C# Project For an International Tax Department Company. My Role was Full Stack Developer in this Project.

Zeeveen

Zeeveen was a large Project By ADAN Builders, my job in that project was to work as a Backend developer and integrate it front end as well. The Project is still under development, but specific role is done.

Billing Denial App

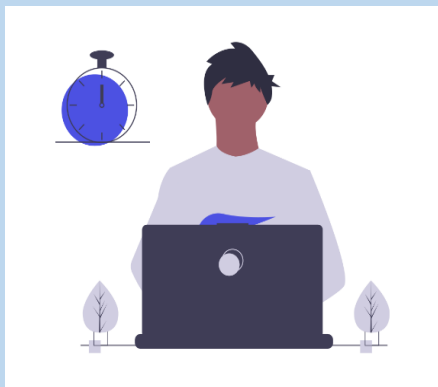

Billing denial app is a ASP.NET CORE MVC Web application, which was developed for specific client requirements, its related to a medical company who want to organize their things easily. My contribution in that project was full backend development and also partially with front end.

Back Office Portal

Job Portal Was ASP.NET Web App for a Korean client, job portal was developed like as other job sites, but that was for a specific country. My contribution in that project is to work with other developers and fix all the bugs and errors from backend.

Localized E-Shop

Localized E-Shop was Web-Based Final Year Project Using MERN stack, that was developed for the local sellers and buyers for local areas, and free management facility for the sellers as well. My Job was Idea creator, Project Manager, as well as Software Designer (SRS + UML + DB design) and work om Front End.
