SUMMARY

Experienced Software Engineer adept in ASP.NET development, excelling in both backend and frontend technologies. Proficient in .NET Framework and .NET Core, with a strong command of C#, SQL, Azure and Angular. Demonstrated leadership and mentoring skills, coupled with a solid understanding of agile methodologies and collaborative tools.

WORK EXPERIENCE

Merik Solutions (Full-time)   Islamabad, Pakistan (On-site)
Senior .Net Developer   March 2023 – present

- Contributed significantly to over 10 projects at Merik Solution, guiding development teams through the complete software lifecycle.
- Specializing in health system-related projects and supporting documenting tool, reporting, and e-commerce initiatives.
- Designed and deployed a role-based access control (RBAC) system to ensure precise user permissions alignment with organizational security policies.
- Independently spearheaded the development and deployment of a pivotal project, earning four additional projects from the same client and significantly boosting company revenue, showcasing adept leadership and technical expertise.
- Played a pivotal role in designing, developing, and maintaining various modules, ensuring optimal functionality and performance, while proactively contributing to project planning and strategizing to meet client expectations.
- Integrated Azure and AWS cloud services for efficient development workflows and scalable deployments, demonstrating versatility in both independent and cross-functional team settings.
- Utilized Git and Jira to manage project workflows efficiently, facilitating collaboration and streamlining development processes, while consistently delivering high-quality work and exceeding stakeholder expectations.
- Successfully engaged with US clients, Fostering a culture of continuous learning within the team and achieving significant improvements in team engagement and defect reduction.
- Conducted regular code reviews and security audits.
- Mentored junior developers, providing guidance in advanced programming techniques.

Moovshack (Contract)   United Kingdom (Remote)

.Net Developer   May 2022 – present

- Led the modification and enhancement of an existing Real Estate application (Agent CRM), ensuring alignment with project requirements and enhancing functionality.
- Spearheaded the development of new property CRM's using Asp.net MVC/.NET 6, seamlessly integrating Stripe payment gateway for enhanced payment processing.
- Designed and implemented intuitive front-end screens utilizing Razor pages, AJAX, Custom CSS, HTML, and Bootstrap, enhancing user experience and engagement.
- Successfully integrated software components and third-party programs, optimizing application functionality and performance.
- Demonstrated proficiency in troubleshooting, debugging, and upgrading existing software, ensuring smooth operation and continuous improvement.
- Presented innovative solutions for various projects and effectively led teams in delivering requested features, maintaining clear communication with stakeholders and business staff to achieve project goals.

TecSpine (Full-time)   Lahore, Pakistan (On-site)
.Net Developer   Aug 2022 – Feb 2023

- Collaborated effectively with a US-based project team, actively contributing to the creation of new components and modification of existing ones.
- Successfully integrated third-party platforms such as eBay, Amazon, and Walmart, enhancing project functionality and expanding market reach.
- Demonstrated proficiency in data scraping techniques, leveraging them to gather valuable insights and enrich project features.
- Optimized the core features of the project, resulting in a 30% increase in performance and delivering a superior user experience.
- Proactively suggested and implemented innovative solutions to enhance project functionality and meet evolving market demands.
- Implemented coding standards and best practices within teams to maintain high-quality, maintainable code.
- Worked within Agile methodologies, focusing on continuous integration and rapid delivery

ADAN Technology (Full-time)   Gujrat, Pakistan (Hybrid)
.Net Developer   Aug 2021 – Aug 2022

- Engineered scalable and efficient APIs using .NET Framework and .NET Core.
- Adopted a component-based architecture in Blazor to create reusable UI components, improving development efficiency and maintainability
- Led backend development for LTHL project, collaborating with multiple teams to create robust APIs using C# within Angular and .NET Core framework.
- Spearheaded outsourced software development for Phillip Fund SuperMart platform in MS Azure Cloud Architecture, prioritizing user-centric design, scalability, performance, reliability, and analytics.
- Played a key role as a Full Stack Developer for American Tax Solutions, delivering a Web-Based ASP.NET MVC C# project with RDLC Reports for an International Tax Department Company.
- Contributed as a Backend Developer for [Zeeveen](#) by ADAN Builders, integrating backend functionalities and aiding in frontend development for the ongoing project.
- Developed a ASP.NET CORE MVC Web application, Billing Denial App, catering to specific client requirements for a medical company, focusing on backend development and partial frontend integration.
- Collaborated on bug fixes and error resolution for the Back Office Portal, an ASP.NET Web App tailored for a Korean client's job portal needs, ensuring smooth backend operation and functionality.

EDUCATION

University Of Gujrat   Gujrat, Punjab, Pakistan
Bachelor's in Software Engineering   Sep 2017 – Aug 2021

SKILLS

- .Net Framework
- .Net Core
- C#
- Azure
- Azure Kubernetes Service (AKS)
- Restful APIs
- Entity Framework

- Dapper
- Angular TypeScript
- JavaScript
- Jquery
- Web design (CSS, Bootstrap)
- HTML5
- Microsoft SQL Server, MySQL
- Performance Optimization (Caching, Asynchronous Programming)
- Git
- Design Patterns
- SDLC
- Agile
- SRS
- Project Management Tools (Jira)
- Mentoring and Collaboration Skills
- Microsoft Tools
- Security (Authentication, Authorization, Secure Coding)
- Mentoring and Collaboration skills
