Projects

Zeeveen.com:

Zeeveen.com is a mega project for the property builders. It is developing in ASP.Net Core with C#. My contribution in this project is full backend development. Still working on this project.

Billing Denial App:

Billing denial app is a ASP.NET CORE MVC Web application, which was developed for specific client requirements, its related to a medical company who want to organize their things easily. My contribution in that project was full backend development and also partially with front end.

JOB Portal:

Job Portal Was ASP.NET Web App for a Korean client, job portal was developed like as other job sites, but that was for a specific country. My contribution in that project is to work with other developers and fix all the bugs and errors from backend.

Localized E-Shop:

"Localized E-Shop" is a web platform for local businesses to advertise and sell their products in local area, and also they will avail a management system and for buyers to buy the products from these e-store with very fast delivery. It was my Final year project, which is developed in MERN Stack. My contribution in that project is managing with Database, software Designing, SRS and also dealing with front end. I was also project manager of Localized E-Shop.

Semester Projects:

- Hotel and Restaurant Management System
- School Management System
- Mart Management System
- Online Hotels Management System (Job done as Requirement Engineer).

Other Projects:

- Car Parking Management System
- Library Management System using.
- UOG GPA Calculator
- Tic-tac Game Using
- Hospital Management system
- Car Show Room Management System
- Many other projects
